MACCHINA OLEODINAMICA
TRANCIA-SMUSSA-FORA-PIEGAMOLLA

Linea dedicata al settore Serranda, progettazione e costruzione di macchine per Serranda. La macchina riesce a piegare, forare, smussare e tranciare tutti i tipi di molle normalmente in uso nella costruzione delle serrande. Un trascinatore collegato al computer permette di impostare la lunghezza, rendendo la macchina automatica.

Line dedicated to the damper, design and construction of machines for damper. The machine is able to bend, drilling, chamfering and cutting all types of springs normally in use in the construction of the dampers. A driver connected to your computer allows you to set the length, making the automatic machine.

Ligne dédiée à l'amortisseur, la conception et la construction de machines pour l'amortisseur. La machine est capable de plier, le perçage, le chanfreinage et couper tous les types de ressorts habituellement utilisés dans la construction des éléments d'amortissement. Un pilote est connecté à votre ordinateur vous permet de régler la longueur, ce qui rend la machine automatique.

Línea dedicada al amortiguador, el diseño y construcción de máquinas para el amortiguador. La máquina es capaz de doblar, fresado, biselado y corte de todos los tipos de muelles normalmente en uso en la construcción de los amortiguadores. Un conductor conectado a su ordenador le permite ajustar la longitud, por lo que la máquina automática.
